

MidSil™ is an exclusive line of high temperature textiles made with the latest development in high temperature fibers. Not a fabric coating or treatment, MidSil™ is a new fiber designed to take 1350°F, and remain flexible and strong in service. Where vermiculite coated glass products often fail as heat exposure grows above 1000°F, and is no longer intermittent, MidSil™ delivers performance you can count on. This family of fibers exclusively available from McAllister Mills is non-respirable, will not burn and is asbestos and ceramic fiber free for a safer working environment. These fabrics are unaffected by most acids, alkalis or solvents. MidSil™ glass is soft, flexible and durable at 1350°F service temperatures which allow a longer life cycle. Available in a full range of products from tapes, fabrics, ropes, and tadpoles, to custom engineered solutions.

BASE CLOTH:	Fiberglass – Wire Inserted
WEIGHT:	35 oz./yd ²
WEAVE:	Twill
THICKNESS:	0.065”
WIDTH:	60”
LENGTH:	50 yards
COLOR:	Silver / Gray
TEMPERATURE RESISTANCE:	Service Temperature 1350°F
