

VR1200: It's the ROCK of protection where toughness is required and fiberglass does not get the job done. Engineered to your application, VR1200 is made from continuous filament volcanic rock fiber for 1200°F thermal protection. This brown colored fiber was only recently available in a quality to meet the demanding standards of McAllister Mills for woven and braided textiles. Applications: Aramid, fiberglass and carbon fiber replacement, laminates, motorsports and industrial end users.

Base Material	Continuous Filament Volcanic Rock Fiber
Weave	Braided
Available Sizes	1" & 2" – Custom sizes by request
Wall Thickness	1/16"
Carton Size	50 ft spools
Service Temperature	1200°F
