

# ArmorMax Facilities

East – Lebanon, PA and Southeast – Anniston, AL

ArmorMax Engineered Systems, a business unit of the MAX Group of Companies, has two locations in addition to our New Castle, Pennsylvania facility. The ArmorMax East plant in Lebanon, Pennsylvania and ArmorMax Southeast, our newest location in Anniston, Alabama. Each site includes manufacturing, warehousing and repair facilities dedicated to refurbishing your company's refractory-lined production components and heat-containment vessels.

Each state-of-the-art facility contains all of the tools, expertise and products we need to rebuild your largest, most critical and most time-sensitive pieces of equipment. What's more, we get everything back to your plant quickly, cost-effectively and without the disruption and inconvenience of on-site repair.

## General

- 90,000 square feet
- 12 acres of property

## Tools

- 4 overhead cranes (10 to 30 tons capacity)
- 20 jib cranes, 10 (1)-ton and 10 (2)-ton
- Rail spur and loading dock with leveler
- Oversized 16-by-20-foot and 25-by-25-foot doors

## Expertise

- In-house engineering and AutoCAD capabilities
- Designed, engineered and installed custom refractory linings by experienced staff for doors, ladles, tundishes, pre-heat stations
- Rebuilds of furnaces, kilns and other refractory- or fiber-lined heat-containment vessels
- Engineered, fabricated and installed custom-designed lining systems (use less fuel and reduce emissions)

## Products

ArmorMax East and Southeast are fully stocked with a wide range of insulating and refractory products through our relationship with leading refractory producers for quick-ship service to customers throughout the east coast.

- Firebrick, mortars, castables, ceramic fiber blankets, microporous block and refractory paper, felt and boards
- Specialty products – precast shapes, weld blankets, curtains, anchors, refractory modules, gaskets and seals

## Benefits

- Lower fuel consumption
- Reduced related emissions
- Accommodation of oversized equipment shipped to and from the site
- Avoidance of cost, downtime and disruption associated with on-site repairs
- Superior restoration work in a controlled production environment
- Quick-ship service of products
- Turnkey installation services

## The MAX Group of Companies

ArmorMax Engineered Systems manufactures and repairs customized refractory linings and equipment at our original facility in New Castle, Pennsylvania, as well in the ArmorMax East and ArmorMax Southeast plants in Lebanon, Pennsylvania and Anniston, Alabama, respectively. Complementary products and services are provided to all locations through our affiliated companies, ThermalMax Insulating Products and ArmorMax Industrial Services.

ThermalMax maintains and distributes a comprehensive inventory of insulating and refractory products. ArmorMax Industrial Services is the specialized arm that offers more than 150 years of combined refractory installation experience. We provide turnkey installation services from initial engineering and design through masonry, gunning, casting and final dry-out.
